

James Courson

A capable developer with an appreciation for clean and concise code. I work most efficiently and enthusiastically in a team setting where I can both motivate and be motivated by my fellow developers.

Experience

InfoBate: *Software Developer (September 2020 - present)*

- Maintained an internal reporting application built on React-admin.
- Supported backend operations with AWS CDK and core services.
- Created and maintained a Wiki.js application for company-wide use.

CGI: *Consultant (June 2019 - September 2020)*

- Developed new features for a large client on an internal Angular 8 application.
- Obtained an Oracle Java SE 8 Associate certification.

Education

Tech Elevator: *.NET Development (December 2018 - April 2019)*

- Designed, built, and deployed several full-stack apps both individually and in a small team using source control and agile development practices.
- Learned and practiced many industry-standard concepts of software development.

Pennsylvania State University: *Computer Science (August 2017 - September 2018)*

- Studied and applied concepts of computer science and software design processes using C++, Python, and JavaScript.
- Learned and practiced web development concepts using HTML/CSS/JavaScript, MySQL, and React.

Personal Project

James' Guide: james.guide

A repository for useful web resources that I frequently use for my skills and hobbies. Built on React, and hosted on GitHub Pages.
