James Courson
coursonjamesm@gmail.com
(412) 651-7751

A capable developer with an appreciation for clean and concise code. I work most efficiently and enthusiastically in a team setting where I can both motivate and be motivated by my fellow developers.

Experience

InfoBate: *Software Developer (September 2020 - present)*
Maintained and developed an internal sales report generation application built on React.
Supported back end systems using AWS.
Created and maintained a Wiki.js application for internal use.
Created a client-facing React-based brochure/help/FAQ website.
Maintained a PostgreSQL database.

CGI: *Consultant (June 2019 - September 2020)*
Worked for a large banking client as a front-end developer on an internal Angular 8 application.
Studied for and obtained an Oracle Java SE 8 Associate certification.
Developed and maintained several React and Angular 8 applications, both individually and within a small team using agile practices.

Education

Tech Elevator: *.NET Development (December 2018 - April 2019)*
Worked within a team to build several desktop/web applications from scratch using C#.NET and Vue.js.
Learned and practiced agile software development.

Pennsylvania State University: *Computer Science (August 2017 - September 2018)*
Studied and applied concepts of computer science and software design processes using C++. Learned and practiced web development concepts using HTML/CSS/JavaScript, MySQL, and React.

Personal Project

James' Guide: *james.guide*
A repository for useful information related to my hobbies; hosted on DigitalOcean.
Open-source. **Currently being rebuilt, expected to re-release December 2024.**
